PROJECTS

Blood Donor FInder *React.js ,Node.js*   https://ragat-nepal-1edt.vercel.app/
This project helps to find blood donor of certain blood group from certaon location.It need signup first and then can search for donors.

Niwaran
It is a website prototype me and my team had made in hackathon. This project is a platform for complaining the problems . Mrarking and complaints can be given through the map rendered in this project.
